Gepard

Always ready to pounce: 2004 V-Twin Touring Sport

A sprinter in a tourer's clothing? You don't show muscles, you have them!

Even the wild cats rest during the day with "low revs" and wait for an opportunity to jump. But beware once the throttle is opened up. "Show and Go" was the concept behind this custom bike of one of Rick's customers – one of the first which left the new workshop in the freshly opened "House of Custom" in Baden-Baden: elegant in style, excellent in execution – and of course with many Rick's parts, including a "Mike" set of wheels.
