Scorpion

A custom bike which stands out: Harley-Davidson FLSTSB Cross Bones in Rick's style

Break with style or a custom bike as a piece of art? If you know Rick's Motorcycle's metal workshop, you also know that almost anything is possible...you only have to ask! Harley's FLSTSB Cross Bones as a stock bike is really a fat Bobber with massive tires and springer fork (!) – and therefore the ideal basis for a Bobber, Old School or Chicano conversion. But customers who have once fallen in love with the typical look of Rick's custom bikes don't care on which Harley model they ride: with their aim in sight, they don't want to compromise any longer. Therefore the Cross Bones was transformed in two months into a custom bike that "pokes you in the eye".
