Fat little Thing

At Rick's Motorcycles all sorts of bikes are converted to have wider rear tires, and Sportster models are no exception. Thanks to swingarm widening including beam, steel rear wheel cover and Rick's offset kit for Sportsters, tire widths of up to 240 mm are no longer a problem. The whole kit has been designed to perfection and works without any problems. Even the wheel runs straight with it, which eliminates any possible negative ride performance almost completely. Added to this were numerous parts from own manufacture, and the result is a Sportster which does not have to hide behind any other custom bike.
