Hommie Roller

Model year 2018 was the end of the Dyna model era. The name still exists as a model designation, but it is no longer a model of its own with its own frame and engine concept. While the new Dynas are only another Softail variant, up to the model change they used to be a link

between Sportsters and Softails.

The Street Bob models used to be such a success that even put Sportster and Softail model sales numbers in the shade. Sometimes they couldn't even be delivered, and used Street Bob models were more expensive than new bikes, which were not available. If you consider that the first Street Bobs were available for about 12,000 Euro, the Dynas, compared to the Softails, had a better ride performance, and thanks to a rubber mounted injection engine, they had the same power as any other Milwaukee-Eight Big Twin, then the success is understandable. No question then that at Rick's special parts were developed for Dynas, which are still very much sought after today.
