Black Shine

Contrast program for the FXBRS "Breakout": Polished aluminum + chrome + black = One fine Rick's streamlined Breakout!

The recipe is as simple as it is convincing – and these images are visible proof: Take a touch of chrome, polished aluminum, add stainless steel – and lots of shiny black paint. Here's the result! Harley-Davidson's "Breakout" can be converted into an exciting drag-style lowrider with very little effort and modifications. Here's another example from the workshops of Rick's Motorcycles/Harley-Davidson Baden-Baden, with a few Rick's Parts added an extremely refined and upgraded custom ride!
