Breakout 260 "H.Lector"

Breakout 260 - H.Lector Style: Escape from daily routine!

It must be in the design! Since their introduction, the three-piece assembled H.Lector Design Wheels have been among the most durable and at the same time most popular wheel designs from Rick's Motorcycles wheels range. The detailed CNC-machined three spokes cut through the air like scythes – and when stationary, the filigree wheel design with the bolted rim halves also makes an appealing visual impression. As available for all Rick's Design Wheels, matching design brake discs and drive pulleys are a major part of this success story and add to the compact look. This 2019 FXBRS "Breakout 114", on which the wheels are deliberately left in natural metal to contrast strikingly with the black paintjob of the stock bike, clearly visualize this! Sometimes, the simple solution is the better solution.
