Brown Sugar - Rick's Low Rider ST in Clubstyle

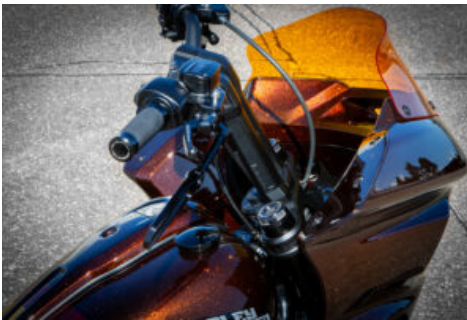

How come you ride so good...?

How come you ride so good...? Harley-Davidson FXLRST "Low Rider ST" premiering Rick's 2023 "Clubstyle" parts.

With the premiere of the Low Rider ST in January 2022, Harley-Davidson reacted quickly and precise to the market development in the "Clubstyle" scene and the just growing popularity of the "King of the Baggers" racing series in the USA. Power-baggers and clubstyle customs have been quite popular for years, especially in Italy and France, but also gained interest and followers in Germany. Even in stock set-up, the Low Rider ST is an impressive powerbike. As the "original" from 1980s heritage, the fairing and bags are uniquely matched to this model – but that fact alone does not define a genuine "Clubstyle" custom. True "Clubstyle" riders are asking for a powerbike which is defined somewhere between a stuntbike and a kneesliding sportsbike. With the option for fast riding on twisting roads and a look that tells a clear message to every observer: "Here I am!"
