Devil Inside

Devil Inside - 2022 Fat Boy FLFBS 114

A devilishly cool Fat Boy customized by Rick's Motorcycles: Superbly refined in both technology and appearance, this infernal vehicle is a prime example of the best possible use of Rick's parts on the currently available Milwaukee Eight Softtail models, in particular the iconic "Fat Boy". Following the design evolution towards the Milwaukee Eight engine and newly designed Softtail suspension for the 2018 model year, the "Fat Boy's" appearance has changed considerably – and as it seems: the metamorphosis isn't over yet. In 2022, the "Fat Boy" was introduced with a new set of wheels – a big step away from the traditional disc wheels to a more "open" design with cutouts in the outer radius which also reduce rotating masses.
