Fat Bob with Rick's Fender Kits

Rick's Harley-Davidson Fat Bob looks at first glance almost like a stock bike. While some observers might need two or three looks, the trained eye will see immediately that only the fender was changed and a side licence plate holder mounted. It's correct, not much more was done, but even this simple bit of customizing has style. That at Rick's the emphasis is on perfection and timeless design is a well known fact, but the path from the first concept to a small series part is a long one.
