Fat Boy "Staccato"

The Fat Boy models are at the top of the list for friends of the brand. With the 2018 Milwaukee-Eight Softail models the Company has presented yet another excellent version of this superior class, which have, of course, found interest with the customizers in Baden-Baden. As far as the in-house made parts program for the models from 2018 is concerned, everything is now available. And what's not possible to make in small series can thanks to specialists be tailormade or adjusted. The results are amazing custom bikes, which are, however, often unaffordable despite keen calculations. With this project it wasn't about trying out the maximum of the possible, but to create a custom bike which is optically and technically perfect and doesn't cost too much. The result is impressive and despite the color far from being a 'plain Jane'.
