Flamin' Blue Fat Boy

Anybody stating that Rick's Motorcycles is a „Fat Boy“ specialist, has certainly “hit the nail” – on the head. Or rather made an „understatement“, if familiar with Rick's history: Naturally, all Harley-Davidson models are „customized“ with the same passion and care at the Baden-Baden workshops, but if the model designator „Fat Boy“ comes up in any contract or discussion, the “early days” of Rick's Motorcycles, when the then Rastatt-based shop started business by modifying “Fat Boy” disc wheels pops up in the back of the mind. Today, Rick's extensive program of design wheels has been responsible for numerous, likely hundreds of stock “Fat Boy” wheel sets changing place into storage shelves or other purposes, substituted by more stylish but also much wider Rick's Design Wheels. As on this example, a wide-tire conversion of the 2022 model year FLFBS – the difficult choice to select one of the many popular Rick's designs for the desired fat-tire-look was only the beginning of this sophisticated and extensive custom-job.
