Grey Fellow

Who said with a 360 tire you can't steer well around corners? At Rick's Motorcycles they have developed a patented swingarm kit with which up to 360 tire widths can be implanted easily, and their speciality is centering it. But more about that later, because Rick's Harley-Davidson Fat Boy has far more to offer than just a 300 size tire. From the tank to the rear fender, to the wheels or the air filter, all was made at Rick's Motorcycles, which makes this "Grey Friend" so special.
