Black Bob

The stock Harley-Davidson Fat Bob offers already a few features that indicate its sporty genes. A 28-degree steering head angle and double disc brakes promise a good performance in bends, as does the intended sitting position. But Rick's Motorcycles wouldn't be Rick's Motorcycles if something good couldn't be made even better, and this Fat Bob was given a makeover which makes out of this Softail an individual custom bike without taking too much away from the original look.
