Fat Jester

The Harley-Davidson Fat Boy is one of the most popular models for customizing, and that is not just the case at Rick's Motorcycles, but almost anywhere in the world. Nevertheless, a Rick's Fat Boy is different to most other conversions from other customizers. The reason for this difference can quickly be found. Most of the custom parts used are made at Rick's in Baden-Baden, and not only do they live up to its own high-quality requirements, but each part has been carefully matched with all other components.
