Magical 300

The Harley-Davidson Slim S models in 2016 were real asphalt burners with plenty of power. The bike was even shortly after its premiere at the top of Harley riders' wish list and became a customizer's favourite in record time. Since then many S models have been given a more individual look at Rick's Motorcycles and still customers' bikes roll into the workshop at Baden-Baden to receive this treatment in order to stand out from the rest on the road with Rick's design wheels, Rick's air filter, stretched tank and of course the 'Trick & Roll' Fat Ass kit, with which a 300 tire can be implanted into the bike very centered.
