The one and only

The Harley-Davidson „Slim“ is, as the name suggests, more (or less...) a „Softail“ model with slim lines. Reason enough for the Rick's Motorcycles team to show that it also cuts a good figure with a wide tailed and a high-class front. Of course, the customizing took place at Rick's in Baden-Baden and almost all parts mounted came straight from Rick's Motorcycles production lines. Here are some details on the most important modifications that make this bike a unique work of metal art!

Tech Facts
