Heartbreaker

2018 was the year when Harley-Davidson presented a completely new Softail family, all new from frame to drive set-up. The Breakout wasn't spared from the revolution of the model range. Meanwhile Rick's Motorcycles has developed numerous design parts and components for the Milwaukee-Eight Softails. To follow the successful design of the Twin Cam models and keep their classic lines was the first rule of the Harley-Davidson developers, a rule that was also being followed in Baden-Baden. The Breakout should remain a Breakout, but more defined, more individual and in perfect Rick's quality.
