Rick's Personal Bobber

There are custom bikes which simply look beautiful at first sight, and there are those where you discover the finer details the more you look at them. Rick's brand-new Bobber, built on the basis of a Milwaukee-Eight Softail Slim, belongs without doubt to those bikes at which you can't look often enough, and every time you look, you discover more unexpected details. We won't be able to describe them all here, but you have two eyes and plenty of photos to look at.
