Precious Metal

Time and time again the boys from Milwaukee are offering Screamin' Eagle special models. Made in small series, these bikes are absolute gems, which were often sold out in the past before they even got to a dealership. These bikes are modified stock vehicles which received in-house parts to spruce them up. If you were lucky enough to get your hands on such a bike, you can be sure to call a very special Harley your own. And really nothing much needs changing on such a bike in order to make it unique, but at Rick's they gave a Screamin' Eagle Softail with a few modifications a little more extravagance.
