The Rickinator

The Rickinator - 2022 FLFBS "Back to the Roots"

Who would have thought in 1990 that a motorcycle with disc wheels, V-2 engine and rather low seating position would once become such a huge success story lasting over 30 years? Certainly a lot of people in the Harley-Davidson community, including one particular Harley customizer and builder in Rastatt, who would soon write his own history with the widening of the first-generation "Fat Boy" disc wheels: Patrick "Rick" Knoerzer. More than three decades and two new engine series have passed since the silver and chrome flashing original "Fat Boy" with the striking yellow trim stripes on the cylinder head, but the spirit of the "Terminator bike" from the Terminator 2 blockbuster movie is still alive. Especially in the highly modified conversions by Rick's Motorcycles, Fat Boy's of all model years that have been extremely refining and re-defining the "Fat Boy" for decades, but never questioned the character of the model itself: Even with a set of Rick's design wheels this 2022 model year "Fat Boy" remains recognizable as FLFBS!
