Platinum Sportster

Platinum literally means small silver. The Incas gave the highly valued metal its name, but were at a loss of what to do with it because of its high melting temperature and the difficult way of working with it. The same applies to the Sportster build series. Ignored for a long time, Harley's little bike stood around in the showrooms waiting for some girl to offer the XL a new home. But this is a while ago, because with the introduction of the Sportster 48, these bikes were highly sought after. Rick's Motorcycles converted a 48 into a very special bike.
