Rick's personal Bagger

Rick's Motorcycles has for years been known for quality custom bike conversions - especially their metal work - and with the in-house made design wheels achieved worldwide success, and now Bagger customizing has also become a speciality. As a showcase for the new line of in-house made touring parts, a custom Bagger was created for Rick personally. Rick's 300 size wide tire kits and V-Rod custom parts are especially in demand with authorized Harley dealers, so the development of touring bike parts was not a priority as the wheels from their own production already run in numerous Bagger projects - and many styles and sizes makes this possible. Someone who wanted a bike modified into a tourer was never turned away. However, now available is a program of high-quality parts, which show the invested development work.
