## Speed Bagger

### Speed Bagger

**High-end speed tourer: New Ricks 26-Inch wheel Bagger! Are you ready for the Autobahn?**

Rick's Motorcycles in Baden-Baden is one of THE German top-shops for all types of customizing, yet their expertise for building high-grade Baggers has not really been challenged in the past years, which is surprising: Rick's Motorcycles was literally ground-breaking for homologating a 30-Inch wheel PLUS the accompanying frame conversion, which could be performed in very short time! To build an extreme Bagger for European roads holds several challenges: Speeds are higher, road surfaces vary in weather and quality – and traffic can be tight and hectic. When Rick introduced his then-new line of Bagger parts in 2012, he already started research into the development of wheels that would take into consideration the physics of motorcycle riding to allow „close to stock“ riding characteristics with radical wheel sizes of 23, 26 and 30 Inch. The 30-Incher was for “special clients” and “special projects”, but 23 and 26 conversions are less radical – and the team is prepared to deal with the new challenges of the Milwaukee Eight frame. Consequently the parts were upgraded for the “Milwaukee Eight” Touring models – and subsequently made available for Rick's customers who wanted something special – something really special! Here's the just finished latest Power-Bagger by Rick's!

## Tech Facts

## Parts-List "Speed Bagger"

Part	PartsNumber	Description	Photo	Link to Shop	Price
Touring Rahmenänderung Standard-Lenkkopf 23"/26" Umbau	65-2200001-1
