Streetfighter on V-Rod basis: Harley-Davidson VRSCDX Night Rod Special 2016

Few V-Rod customs appear as radical as this conversion from Rick's, combining aggressive looks with cool chassis components from Rick's early V-Rod customizing days, which won't surprise people who know Rick's.

Shortly after the introduction of the V-Rod, Rick's Streetfighter customs received a lot of attention, not least because of the elaborately constructed single-sided swingarm, which not only allowed for wide tires (then), but in combination with the brake system placed on the left presents a completely "free" rear view onto the forged "Spoke" design wheel in 10.5 x 18-inch tire size and a 280 Metzeler tire.
