V-Rod 280

It has been a while since the last V-Rod rolled off the assembly line at Harley-Davidson. With the FXDR, which was introduced as the official successor in 2018, they have indeed a bike in their portfolio which can also be called a power cruiser, but without its own frame and engine like the former V-Rod models. At Rick's Motorcycles in Baden-Baden they still have a lot of parts in the program which can make real show-stoppers out of the liquid cooled bikes, and many can be found used on the black beauty on these pages.
